TECHNICAL GUIDELINES

1. Basic of Contract

Organizer, legal and economic entity is

agra Veranstaltungs GmbH
Friedrich-Ebert-Straße 26
04416 Markkleeberg Germany
HRB 20560

Telefon: +49 341 98972106 / -7
Fax: +49 341 98972185
Email: info@jagd-und-angeln.de
Internet: www.jagd-und-angeln.de

The agra Veranstaltungs GmbH (hereinafter referred to as "organizer") is the contract partner of all exhibitors. The organizer is represented towards the exhibitors by the exhibition management. The contractual relationships between the exhibitors and the organizer are regulated by the following conditions of participation. The following terms are part of the contract: The registration of an exhibition area via www.jagd-und-angeln.de or in written form by using the application forms provided, the conditions of participation, the nomenclature and the technical guidelines of the exhibition.

Unilateral proviso or conditions in connection with the registration for an exhibition stand will not be considered. Additional agreements must be made in writing.

By signing the registration form, the applicant acknowledges these terms and conditions as legally binding. The exhibitor is obligated to inform his staff and service providers about these terms and conditions and is liable to observe their compliance.

General terms and conditions and special conditions of the exhibitor are excluded as parts of the agreement.

In case of violations of the conditions of participation and technical guidelines, the organizer is authorized to take appropriate actions and may pronounce the immediate exclusion from the exhibition.

2. Stand Construction Regulations / Fire and Safety Regulations

The general construction norms and conditions regarding fairs and exhibitions must be met.

Below are excerpts of some of the most important facts from the mentioned guideline. The exhibition stand must be designed so that from every point of the stand, two separate and viewable escape lanes can be reached in less than 5 meters. A main lane must be reachable from any point of the escape lanes within 10 m. Any kind of barriers and steps on escape lanes are strictly forbidden.

Every stand or parts of a stand accessible by visitors must have, or must be reached by, a safety light

system. The DIN-VDE norm is required for all electrical systems at the exhibition. Decoration elements such as textiles, tablecloths, foils or decoration elements require at least DIN 4102 "hardly inflammable" (also colloquially known as "B1"). The exhibitor must be able to declare the compliance of the used materials and must be able to hand out a certification about used impregnation.

Deciduous and coniferous trees may only be used with moist root-balls. Bark mulch, turf or similar materials may only be used in a wet condition.

The storage of any type of empty goods (e.g. packaging materials etc.) within or outside the stand area, especially in between the hall wall and the stand is not permitted. All heat-generating equipment must be installed with a safety device. Adjacent, flammable materials must be kept in a distance inhibiting inflammation. Any kind of unprotected lights or open flames are strictly forbidden inside the exhibition halls. The usage of flammable liquids and gases inside the exhibition hall and in the outdoor area is strictly prohibited. Non-used flammable materials have to be transferred immediately into provided garbage containers or to designated disposal locations. Easily flammable goods can only be stored by using appropriate coverage. The usage of easily inflammable liquids requires provision of adequate fire-extinguishers by the exhibitor. Explosive materials are subject to the Explosives Act and are not allowed to be displayed. This also refers to munition in terms of the law of arms. All other hazardous materials are not allowed to be brought into the exhibition venue.

All vehicles and machinery with combustion engines are only allowed in the exhibition halls with an empty tank to the greatest possible extent. The batteries are to be disconnected and the fuel tank is to be locked.

The usage of open fire, flammable gases, pyrotechnic and any other explosive material as well as smoking is prohibited inside the exhibition halls. Exceptions require written permission of the operator, the organizer and an explicit consultation with the local fire department.

The use of any remote-controlled flying objects or balloons is subject to approval by the organizer. Air balloons can only be filled with safety gas. Fire brigade movement zones, hydrants or other important safety devices like switch boxes and smoke venting systems must maintain permanently accessible.

The hallways must remain free. Objects or part of exhibition stands may not occupy or protrude into the hallways. All buildings and constructions must be executed in compliance with statutory regulations.

Constructions which have to handle extraordinary forces or loads require general building inspectorate approval. Before the commissioning of an exhibition

stand, a technical approval of structural and fire safety measures must be concluded

Any instructions/orders issued by regulatory agencies, police or fire department must promptly be obeyed at all times and entirely. The used technical equipment must meet the EG- Machinery Directive and require all necessary protection measures and safety matters concerning this regulation to prevent hazards to human life and health.

Technical equipment according to the EG- Machinery Directive must be labeled with the CE-sign and must fulfill all relevant points of the EG-Directive. Every exhibition stand must be able to provide an EG conformity declaration as well as an original operation manual.

3. Escape and Emergency Routes, Fire Safety and Release Mechanisms

Escape and rescue routes are to be kept free at all times in their full length and width. No objects that could cause tripping (e.g. cable, electric cords) should be left on the floor. This also applies to cables covered by e.g. rubber mats or tape. The windbreakers between the inner and outer door at the entrance of the hall must be kept free at all times. The placing of material in this area is prohibited. Flags, banners and stand parts or constrictions of any kind at the exhibition lanes are forbidden. This also includes the airspace above the exhibition lanes.

Wall hydrants, fire warning devices, escape route maps, fire extinguishers and other fire-safety equipment have to maintain accessible and viewable permanently. Access to the detector system for the smoke removal, especially for the detectors behind the exhibition stand, must be kept free at all times. If necessary, the exhibition stand must be designed in the way to allow the accessibility to the fire detector system. The fire protection door may not be blocked, waged or lashed. The opening circle of the door must remain free as well as the arrest system of the doors, so the functionality is given in case of an emergency situation. The signs of escape or emergency lanes must remain viewable at all times and may not be covered. For larger exhibition stands, an additional escape and emergency signage must be provided. This must be coordinated with the organizer, the operator of the exhibition stand, and the local building authority prior to the event.

4. Special Constructions and Goods

Exhibition stand constructions with a wall higher than 2.5 m, advertising structures above 3.5 m, multistoried buildings or any kind of special type of construction must be mentioned in the application form. The exhibitor has to bear the costs if a technical approval by the local authority is necessary.

Exhibition goods which may exceed a height or width of 2.5 m and a total weight of 1000 kg must be specifically characterized in the application form. In case an exhibition good applies punctual heavy pressures on the hall ground, the estimated punctual pressure and the size of the affected areas must also be mentioned.

5. Stand Walls / Stand Construction

In case the exhibitor does not build his own exhibition stand, he is obligated to order stand partition walls by using the exhibition registration. If the organizer notices a missing partition wall during the approval of the exhibition stand, the missing partition wall will be provided by the organizer on the exhibitors' expense. Exhibition goods, inventory, exhibits and advertising structures must be constructed in a stable manner to ensure that the lives and safety of persons, and public safety and order are not endangered. For special structures and large exhibits, a verification of stability must be prepared by the exhibitor. Stabilizing stands against neighboring stands or existing building structures is prohibited. The exhibitor is responsible for structural safety and must provide proof of this if necessary.

Spotlights, speakers and other equipment can only be installed on proper dimensioned load handling device. The installation must be done with approved slinging means. The construction must contain a secondary safety component by using a proper dimensioned safety rope. Cable ties, screw clamps or any kind of clamps to fasten statically loaded parts such as lightning etc. are not permitted.

6. Delivery / Clearing

6.1. Delivery of Exhibition Goods and Packages

The exhibitor is obligated to receive his exhibition goods and packages on his stand personally.

The organizer will not accept any consignments in the main office. The delivery address has to be communicated to the sender as follows

**agra Veranstaltungsgelände
Bornaische Straße 210
04279 Leipzig
"Jagd & Angeln"**

Company and contact person

References to indoor or outdoor location as well as stand number

6.2. Exhibition Haulage Contractor

The official haulage contractor is the official haulage contractor of the agra Veranstaltungs GmbH. Services can be ordered via the official service order forms. The haulage contractor operates according to terms and regulations of the General German Haulage Conditions.

6.3. Low-loading Trucks, Tower Cranes, Forklifts, and so forth

Usage of drivable cranes, special cranes, low-loading trucks, forklifts and so forth for construction and deconstruction purposes is only allowed via the haulage constructor of the agra Veranstaltungs GmbH for safety reasons.

6.4. Empties

The storage of any type of empty goods (e.g. packaging materials etc.) within or outside the stand area is not permitted. Pickup and delivery can be arranged by a forwarding agent of the exhibition.

6.5. Driving along the Exhibition Area

Driving vehicles onto the exhibition venue is only permitted during the assembling and deconstruction periods or outside the visiting hours to bring or collect goods from exhibition stands. By the end of the assembling period, all vehicles must leave the exhibition area.

Illegally parked vehicles, trailers, containers, receptacles and empty goods of any kind will be removed at the cost and risk of the owner. Removed vehicles can only be released once all necessary costs incurred by the owner have been reimbursed.

The access for vehicles into and out of the exhibition area can be limited in the common interest of all concerned. The speed limit at the whole exhibition area is 30 km/h for all vehicles. Inside the exhibition halls and wherever the traffic conditions demand, the speed must be limited to walking speed.

The regulations of the official German Road Traffic Act StVO apply.

6.6. Parking

Trucks and cars can be parked in a short distance to the exhibition area. Parking tickets for this area can be ordered from the organizer. Caravans and campers can only be parked with a valid parking ticket in the provided areas for this kind of vehicles.

6.7. Supply of Exhibition Stands

For the entire time of the exhibition, cars and trucks can enter the exhibition area outside the visiting periods for supply reasons from 7:00 to 9:00 am and from 06:00 to 08:00 pm. To ensure compliance with these regulations, a deposit of 100,00 € shall be collected at the entrance gate, which shall be repaid in full upon timely exit at the exit gate.

6.8. Costs

Transport and disposal, storing empty goods, clearance, self-constructed stands and restoring of the exhibition space are at the expense and risk of the exhibitor.

7. Technical Installations

7.1. Lighting

The general lighting in the halls will be provided by the organizer.

The exhibitor is responsible for lighting the individual exhibition stand.

7.2. Electrical Installations

Electrical power will be provided in form of a TNCS-electrical system.

The connection of an exhibition stand to the electrical system can only be undertaken by the company authorized by the organizer. Portable electrical equipment (wire extensions, electrical distributors, coffee machines) must comply with the DIN VDE 0701-0702 norm. Frequency controlled machinery and facilities must be equipped with a residual current circuit breaker of the type B SK. The operation of this kind of machinery must be reported to the organizer and operator. All installation work must be executed according to the order form of the technical services.

7.3. Water Installation

Drinking water is provided with a working water pressure of approx. 2.5 bar.

The installation of water intake and outlet can only be undertaken by the company authorized by the organizer.

7.4. Disorders

The organizer is not liable for any losses or damages resulting from power, water or telephone network supply faults or electrical interference.

8. Advertising

8.1. Advertising Spaces

A small amount of advertising spaces can be rented by the exhibitor. Any advertising material e.g. company labels etc. shown outside of the exhibition stand are prohibited. The advertisements shown may not contravene the rules of moral. Religious, political or ideological advertising is prohibited.

8.2. Unfair Competition

The exhibitor is obligated to refrain from any action and measures against the principle of good faith as well as against laws and rules of unfair competition towards other exhibitors.

8.3. Brochures

Printed material, brochures and other advertisements can only be distributed at the exhibition stand and may only contain company-owned information. Speakers / video devices / acoustical and optical presentations may only be permitted if neighboring stands and public visitors are not disturbed by it. For musical renditions, a permission by the GEMA is necessary.

8.4. Filming, Photographing and Drawing

Filming, taking pictures or drawing for commercial purposes is only possible with an approval of the exhibition management. For recordings of an exhibition stand an authorization of the stand owner is necessary. The organizer is authorized to produce photographs, video recordings or drawings of exhibition goods or exhibition stands for general publication and in-house purposes. The exhibitor renounces all objections in this context from commercial protective rights, in particular from copyrights.

8.5. Opinion Polls etc.

Enforcement of opinion polls is only permitted at company stands and must be communicated to the organizer prior to the event. Promotional contests, raffles etc. must also be communicated to the organizer.

9. Exhibitor Passes / Parking

Free exhibition passes for the booth staff are being provided by the organizer by the conditions mentioned in the main application form: for the first 10 m², 2 passes, and for each additional 10 m², 1 more pass, up to 10 passes. The exhibition passes will be delivered in combination with the stand booking confirmation.

Additional passes can be purchased. The use of the parking area is subjected to charges. Parking tickets are provided under the conditions mentioned in the conditions for parking tickets.

10. Security

During the exhibition and the official assembling and deconstruction periods, the organizer is responsible for the general security of the exhibition halls and open areas. Notwithstanding the above, exhibitors must also organize security for their exhibition goods. The "Sächsische Wach- und Schließgesellschaft, Leipzig" is officially responsible for the security. Providing own security staff of a different company is prohibited.

11. Cleaning / Waste Removal

Cleaning of paths and gangways is the responsibility of the organizer. Cleaning of exhibition stands is the responsibility of the stand owner. Based on the principles of recycling management and waste law, the waste disposal must be implemented according to the Saxonian law. The correctly sorted collection of all packaging waste is realized by provided containers around the exhibition area.

Bulky waste, especially old parts of the exhibition stand, must be recycled by the stand owner or a

company responsible for stand constructions on their own expense outside of the exhibition area.

12. Environmental Protection

The exhibitor is obligated to ensure that all his contractors obey the regulations and instructions concerning environmental protection, and to ensure that his contractors are likewise required to do so. Possible contaminations or environmental hazards (e.g. petrol, oil, solvents or paint) must be reported immediately at the exhibition management.

13. Public Order and Security

13.1. General Safety Regulation

The exhibitor is fully responsible for the stability and operational safety of all exhibits, equipment and installations according to the guidelines for labor safety and accident prevention regulations. The exhibitor is obligated to inform his staff and service providers about these terms and conditions and is liable to observe their compliance.

Hallways, gates and exits must remain fully accessible at all times.

Closed areas may not be entered or navigated on with any kind of vehicles. Fences, barriers e.g. may not be crossed without authorization. Storing stand construction materials or empty packaging inside and outside the exhibition stand is prohibited. Organizer and regulatory authorities such as Police, fire fighters e.g. have the authorization to do safety checks and controls at any times.

14. Liability, Assertion

14.1. Liability of the Organizer

a. The organizer ensures that the exhibition area is in a condition according to contract during the assembling and deconstruction periods as well as during the event to ensure proper usage.

b. The organizer is liable for personal injury suffered, while staying on the exhibition ground or during accommodation, only with statutory regulations. The organizer shall not be liable for damage that is caused by force majeure, such as all kind of circumstances caused by events of nature or measures taken by the authorities like strike, sabotage, riots, war or war like operations.

c. The organizer is liable for caused damages on property at the exhibition area only in case of a deliberate act or culpable negligence of any legal representative, agent or employee. The organizer shall not be liable for damage that is caused by force majeure, such as all kind of circumstances caused by events of nature or measures taken by the authorities like strike, sabotage, riots, war or war like operations, or crimes of third parties. The exclusion of liability is also valid for stand equipment, exhibits etc. which may remain at the exhibition area beyond the end of the exhibition period.

15. Liability of the Exhibitor

The exhibitor shall be liable toward the organizers for damages caused by him, independent of whether it has been caused by himself, his employees, representatives or his exhibits.

16. Legal Obligation

16.1. Exhibition Regulations and Technical Guidelines

The exhibitor acknowledges the exhibition regulations and technical guidelines as legal binding by submitting his main application form.

By ordering any kind of additional service the exhibitor accepts the mentioned terms and conditions according to the service provider.

The exhibitor is obligated to ensure that all his employees, representatives or contractors recognize the exhibition regulation and additional terms as legal binding.

17. Official Regulations

The exhibitor is obligated to ensure that all his employees, representatives or contractors recognize all relevant legal and official regulations, especially fire, construction and police regulations as well as regulations according to forwarding agents, managing goods and regulations according to advertising as legal binding.

18. Property Holders' Rights and Controlling Power

The organizer exercises property holders' rights and controlling power throughout the entire exhibition area. In case of violations of the exhibition regulations, the organizer is entitled to take appropriate actions and if necessary, pronounce and implement immediate exclusion from the event.

If the exhibitor or a representative of the exhibitor do not proceed the requests of the organizer, the organizer is entitled to clear the exhibition space and if necessary store exhibits without any acceptance of liability at the expense and at the risk of the exhibitor. The payed stand rent will not be returned and no claims for damages can be made.

19. Severability Clause

These Terms and Conditions of Participation and this contract will remain valid even if individual conditions should become invalid. The respective condition must then be replaced by a condition that corresponds as far as possible to the original commercial purposes.
